SKILLS

Languages
Python, Golang, Typescript, CSS, HTML

Frameworks
Angular, Flask, Django, Ruby on Rails, NestJS

Frontend development
React, Redux, Material UI, Next.js

Backend development
Node.js, Express.js, MongoDB, PostgreSQL

DevOps
Docker, AWS, GCP

Version control
Git

Project Management
Agile Methodologies, Daily Standups, Sprint Planning

Monitoring and Logging
ELK Stack (Elasticsearch, Logstash, Kibana)

EDUCATION

BACHELOR OF TECHNOLOGY
GALGOTIAS
UNIVERSITY 2018-2022
CGPA- 8.0

SENIOR SECONDARY
MAHARAJA AGRASEN PUBLIC SCHOOL
2016-2017
% achieved- 70%

WORK EXPERIENCE

BITCS | Trinity Agtech | 2023-present
Frontend Developer

- Served as a senior frontend developer, spearheading the migration of the UI module from a .NET monolith to React, resulting in a significant enhancement of the user experience.

- Optimized existing codebase by refactoring and implementing best practices, leading to improved code quality and maintainability.

- Demonstrated strong problem-solving skills by resolving bugs and addressing issues, ensuring a seamless user experience and high product quality.

- Led the complete revamp of the homepage UI into an interactive and customizable page, utilizing React, Redux, and Material UI to deliver a visually appealing and engaging user interface.

BITCS | Gocaribou | 2022-23
Full Stack Developer

- Thrived as a full-stack developer, leveraging expertise in Golang.

- Led the decoupling of complex functionalities from a monolithic architecture, transforming them into efficient microservices using Golang and TypeScript.

- Collaborated closely with teams such as Analytics and DevOps, ensuring seamless integration and effective communication in order to reduce downtime and enhance overall system performance.

- Demonstrated proactive project management skills through daily standups, sprint planning, and the creation of monitoring dashboards using ELK, contributing to streamlined development processes and improved team coordination.

BITCS | 2021- 2022
Software Developer Intern

- Commenced career as a software developer intern, gaining hands-on experience with TypeScript, React, Next.js, Redux, and React Native.

- Collaborated in resolving UI issues, actively participating in daily scrums, and contributing to the addition of new features and pages.

- Demonstrated adaptability and a proactive approach while working in a dynamic team environment, honing skills in front-end development and problem-solving.

- Acquired valuable knowledge in software development methodologies and successfully contributed to the overall growth of the team during the internship period.

Omnipresent Robottech | Jul 21- Nov 21
Software Developer Intern

- Successfully contributed as a software developer intern at Omnipresent Robot Tech, utilizing Python, TypeScript, and frameworks such as Angular, Flask, and Django.

- Demonstrated proficiency in maintaining and enhancing the existing product, resolving bugs, and implementing new client features.

- Played a key role in optimizing the user experience by revamping the product's UI, resulting in improved efficiency and enhanced user satisfaction.

- Actively collaborated with a dynamic team to deliver high-quality solutions, gaining valuable experience in software development and contributing to the company's success.
